-Press Release-

CEDIA ELECTRIFIES US AGAIN

April 14, 2002
Sydney, NSW Australia

It has been announced today that CEDIA (The Customer Electronic Design and Installation Association) placed 2nd as best booth at the designEx trade show. DesignEx is an annual event showcasing the latest developments in design and architectural fashion for residential and commercial properties.

CEDIA participated in designEX because of their prominent role in modern design and architecture. "Architecture is yet another industry being effected by the latest developments in the electronics industry," said Kerrie Basha, Regional Coordinator of CEDIA Australasia. "Everything from HVAC to mood lighting in the dining room has been affected by the boom in presentation electronics."

"New home construction and home renovation has been especially effected," continued Basha. "Residential real estate values can increase or decrease according to the level of automation within a home."

Reflecting a keen eye to design not only the latest and greatest in home theatre systems, CEDIA's show floor booth received an admirable nod from the designEx collection of designers, architects and artisans.

"We are really honoured to have been awarded this distinction," adds Basha. "With so many exclusive stylists represented here, we are flattered to not only participate in such a fashionable expo, but to be recognised by them as well. Recognition by our peers is a tribute to CEDIA and all of the CEDIA members."

About CEDIA Australasia

CEDIA was founded in the U.S. in September 1989 and has more than 1800 member companies worldwide. In 1994 Australasia became the first international chapter and is recognised as one of its greatest successes. CEDIA is recognised as the leading international trade association whose members specialise in the planning, design and installation of electronic systems. These typically include media rooms, single or multi-room entertainment systems, home automation and communication systems and integrated whole house sub-systems that provide control of entertainment, lighting, security and HVAC systems among others.

For more information on CEDIA, CEDIA memberships, and the CEDIA Expo in May 2002, contact Kerrie Basha at kerrie@cedia.com.au or by visiting www.cedia.com.au.
